- Telco charging & payment gateway plug-ins

- Export invoice data to accounting & ERP softwares

Unlock the power of Dimensions for your teams

Empower your teams with a no-code interface, real-time insights, and seamless integration, making complexity a thing of the past.

Product

Empower your product managers with Dimensions' no-code interface. Easily configure product prices, entitlements, and subscription plans. The real-time dashboard allows for quick updates and iterative adjustments to pricing and offers.

Operations

Streamline customer lifecycle management. Authorized agents can access subscriber data and transactions. The finance team benefits from auto generated invoices and tracking in one place.

Technology

Leverage online API resources and developer sandbox for seamless product integration. Configurable API simplifies partner collaboration. Effortlessly export data with configurable tools.

Sales

Empower your sales team with an intuitive online interface, streamlining offer searches and quotation generation. Centralized product configuration ensures consistency for a superior customer experience.
